

BACCI OPEN HOUSE

10-24 APRIL 2024
CASCINA (PI) - ITALY

Dear Partner,

As you gear up for the prestigious **Salone del Mobile** (International Furniture Show) in Milan, we are excited to extend a special invitation to you for the **BACCI OPEN HOUSE SHOW**.

This event, scheduled in **April 2024**, before, during, and after the **Salone del Mobile**, is an opportunity for you to explore the cutting-edge advancements in CNC machines for woodworking at our factory.

The **BACCI OPEN HOUSE** promises an immersive experience, providing you with the opportunity to witness firsthand the precision and efficiency of our state-of-the-art CNC machines.

As a valued member of our network, your presence is crucial to make this event truly exceptional.

EVENT HIGHLIGHTS

Guided Factory Tours

Gain firsthand knowledge of our production processes and witness the precision and dedication that goes into crafting our products.

Live Demonstrations

Explore our cutting-edge CNC machines in action, demonstrating their capabilities in woodworking applications.

Product Showcase

Get an exclusive preview of our latest product releases, designed to meet the evolving needs of the woodworking industry.

Interactive Sessions

Engage with our technical experts and industry professionals who will be on hand to answer your questions and discuss the features and benefits of our CNC machines.

Networking Opportunities

Connect with other industry professionals, fellow dealers, and our team to foster valuable relationships and exchange ideas.

Free Transportation

We are pleased to offer complimentary transportation from Milan Furniture show to our factory and back to Milan (or from arrival Airport in Italy), ensuring a hassle-free experience for our guests.

Accommodation

To make your visit more convenient, we are providing complimentary accommodation for the duration of the event. Rest easy in a comfortable setting and wake up ready to explore our innovations.

Culinary Delights

Enjoy delectable meals with complimentary lunches and dinners provided throughout the event at the best restaurant nearby our factory.

Wine Tasting (Optional)

For those interested in indulging their senses further, we are offering the opportunity to explore local wineries with a wine tasting experience. Please let us know in advance if you would like to participate in this optional activity.

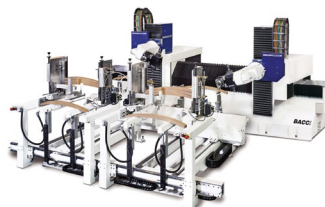

BACCI OPEN HOUSE

10-24 APRIL 2024
CASCINA (PI) - ITALY

TECHNOLOGIES ON DISPLAY

The Bacci **T4MO CNC**, a three-dimensional milling machine capable of processing even flat surfaces and sharp edges, with levels of finish and productivity unattainable with conventional lathes, has enjoyed great initial success. Today, Bacci is thrilled to present the new **T4MO CNC PLUS**, now equipped with sanding units and electro-spindles for drilling and milling operations.

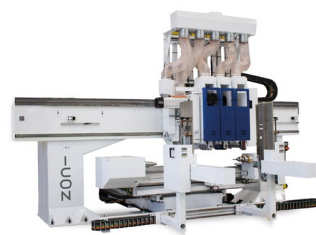

In all of the world, the Bacci **DOUBLE JET** is the only CNC machine with dual 5-Axes spindles capable of having both spindles working on a single element simultaneously. Double your daily productivity and halve your payback time with compact footprint machine.

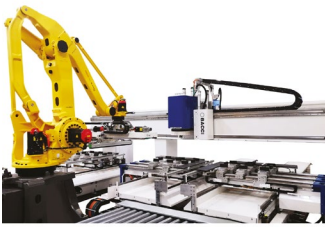

The Bacci **POWERLATHE** is ideal for the simultaneous 5-axis machining of 4 pieces with maximum productivity and accuracy. The Bacci **POWERLATHE** is the perfect solution for rifles, chair elements, sporting goods and musical instruments.

The Bacci **TWIN** provides top of line performance for chair components manufacturing. The unparalleled vigor of the X axis makes the Bacci **TWIN** machining center a best-seller for chairs and solid wood elements production.

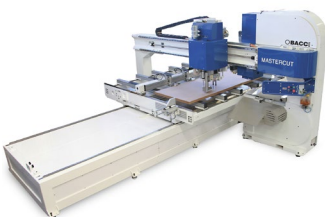

The Bacci **ICON** performs turning, milling and sanding operations. The Bacci **Icon** uniquely allows the simultaneous processing of 2 pieces, thus doubling its productivity.

Solid wood door manufacturers from all over the world agree! The Bacci **MASTER PRO**, from the ground up, is perfectly designed to provide the sizing, squaring, profiling and sanding needs of custom 5-piece solid wood (MDF too!) kitchen cabinet door and center panel manufacturers. Small batches, different door sizes and multiple profile requirements are no problem!

The Bacci **MASTER ONE** is a one of a kind machining center, capable of machining all 6 faces of a piece without using counter templates and without the need for manual repositioning. The Bacci **MASTER ONE** is ideal for small batch production thanks to the servo-motorized positioning of the clamping elements.

Look no further than the Bacci **MASTER CUT**, a CNC bandsaw with a router and a drilling unit, when you need a solution for cutting operations that also require milling and drilling operations. The Bacci **MASTER CUT** is perfect for cutting solid wood panels, MDF, plywood, plexi-glass, foams and other material composites.
